

EATING DISORDER

Promotion, Prevention, and Early Intervention

NEWSLETTER - WINDSOR AND ESSEX COUNTY EDITION

HELLO!

These are difficult days for everyone. Covid-19 has radically changed the way we all do business and our daily lives. We at ED PPEI are thinking of you, our community partners and wishing you all the best.

Thank you again for participating in the community meeting hosted by BANA in partnership with OCOPEd to learn details about a new initiative entitled:

THANK YOU

Eating Disorders: Promotion, Prevention and Early Intervention.

NEXT STEPS

We are continuing to work on all aspects of the ED PPEI build based on information gathered from the community meeting including:

- a. Refining the foundational training workshop
- b. Gleaning youth / caregiver perspective on the ED PPEI framework
- c. Examining ways to make ED PPEI culturally competent
- d. Exploring ways to build capacity for the scale up of ED PPEI across the province

We plan to initiate a working group / Community of Practice at the local level to mobilize ED PPEI in our community. As a follow up, we will be in contact with those of you who expressed interest to be part of this group.
